

## **Test Plan for Travel Insurance(TI) Search page (only for Automate)**

### **Goals:**

1. Cover all functionality which available for user on MainPage and SearchPage for Travel Insurance
2. Integrate test to CI/CD

### **Environment:**

- Staging for UAT [https://www.gobear.com/ph?x\\_session\\_type=UAT](https://www.gobear.com/ph?x_session_type=UAT)

### **Test Pages:**

- Main page (related with Travel Insurance)
- Search page (related with Travel Insurance)

### **Test objects:**

1. Main Page:
  - TI card with all functionality
  - Transfer data from TI card to search page
2. Search Page for TI
  - Filter category
  - Sort category
  - Details category
  - List of result
  - head tips block

### **Implementation strategy:**

- prepare test data and test env
- if we have test cases implementation by test cases
- if we don't have test cases implementation all functionality as P1 take next by 1 option:
  - Slider
  - checkbox
  - radioBtn
  - dropdown
  - calendar
  - add 1 more travel location
- if we have API level testing for UI implement need check only one from the next ui elements:
  - Slider
  - checkbox
  - radioBtn
  - dropdown
  - calendar
  - add 1 more travel location
